

Customised Hydraulic Presses

Pressure 100 - 400 bar

Closed Frame Presses ('H' Frame)

Capacity 10 - 2000 ton

500 ton Metal Forming Press (Ship building industry)

Features

- Press frame structures, cylinders & power packs are precision engineered in design & construction
- Press frames thermally stress relieved based on application
- Precision machined to maintain alignment of the moving frames under operating loads
- Based on the type of press & application, guiding arrangements are provided
- Hydraulic and electrical elements of reputed make to ensure trouble free operation & productivity

100 ton Hydraulic Roll Bed Press (Manual travel of cylinder & frame)

800 ton Forming Press (with hardened wear plates)

100 ton Hydraulic Roll Bed Press (Hydraulic travel of cylinder & frame)

250 ton Semi-Automatic Moulding Press (Hydraulic table travel, Electrically heated platen)

20 ton Bush Fitting Press

Customised Hydraulic Presses

Pressure 100 - 400 bar

Tie-Rod Presses

Capacity 5 - 200 ton

20 ton Lab Press
(Electrically heated platen)

50 ton Semi Automatic Double Daylight Press
(Electrically heated platen)

600 ton Semi Automatic Moulding Press
(Electrically heated platen)

Open Throat Presses ('C' Frame)

Capacity 5 - 200 ton

100 ton 3 Station Indexing Press, Semi Automatic

100 ton Automatic PLC Control Metal Forming Press

150 ton Metal Forming Press

Horizontal Press

400 ton Horizontal Press
(Steel plant - shaft dismounting)

Briquetting Press

For compressing shredded garden waste into briquets of 1kg
